Let's Talk!

## Orlando 2023

Mark Cooksey, DME Quality Engineer,  
Norton Healthcare

Create an ISO 13485-ready Quality Management System: Lessons Learned from Norton Healthcare

**Tuesday, October 31, 4-5pm**

ISO 13485 is an often-misunderstood set of standards for a certified Quality Management System (QMS). ISO 13485 was created primarily for medical device manufacturers and has significant applicability to medical device servicers like Norton Healthcare Corporation's Clinical Engineering (NHC CE). NHC CE chose full implementation and ISO certification, but your company can reap significant benefits by creating an "ISO-ready" QMS today by leveraging existing systems and developing new processes to address common gaps such as vendor management and quality improvement. Come learn shortcuts to lead your organization to become an ISO-ready organization. It's closer than you think.

---

Welcome to MD Expo 2023!

## What you will take back

- Gain insight into ISO 13485
- Learn why Clinical Engineering sought certification
- Conduct QMS ISO Readiness Assessment
- Investigate implementation strategies
- See the benefits of an “ISO 13485-ready” QMS

# QMS

QUALITY MANUAL

QUALITY SYSTEM PROCEDURES

DIAGNOSTICS

REGULAR AUDITS

IMPROVEMENTS

What are the major QMS elements?

# ISO 13485 DOCUMENT HIERARCY

**Quality Manual** – Quality Management System  
Manual for all operations

**Policies** – Legacy and new ISO 13485 QMS Policies

**Procedures** – SOPs & new ISO Quality System  
Procedures (QSPs)

**Work Instructions** – Standard Work Instructions  
(SWIs)

**Records** – Used to show evidence of QSP  
compliance (CMMS, Training Logs, etc.)

AUDITS

# Why ISO?

**MD EXPO**  
Orlando, FL • October 29-31, 2023

## TJC

FOCUS:  
**ORGANIZATION**  
OF QUALITY

## DNV

FOCUS:  
**QUALITY** OF  
THE  
ORGANIZATION

- NHC accreditation moved to DNV
- DNV is ISO 9001-based
- NHC chose to align with ISO 9001
- Clinical Engineering chose **ISO 13485**

**ISO 13485** is based on 9001 but specific to **device manufacturers** and **servicers**

## Why did Norton seek ISO 13485?

# ISO Family

**MD**EXPO  
Orlando, FL • October 29-31, 2023

9001 is a **general** quality model for continuous improvement

13485 is a quality model for **medical devices** incorporating **risk management**

13485 is complementary with 9001

# Getting Ready

**MDEXPO**  
Orlando, FL • October 29-31, 2023

- Step 1 - **Identify** all *applicable* ISO 13485 **clauses, sub clauses**
- Step 2 – **Assess readiness** of each clause / sub clause
  - Scale of 1 to 5 (1=No evidence 5 = Well documented evidence)
  - Questions:
    - Do you have specific [ISO 14585 QM, QSP, SWI] documents present?
    - Is there a set of procedures, processes, and training in place?
    - Are there records to support this?
- Step 3 – Develop strategies to **close** readiness **gaps**
  - Develop documentation
  - Develop training
  - Improved records management

## ISO Readiness Assessment

# Getting Ready

**MDEXPO**  
Orlando, FL • October 29-31, 2023

	<b>Section 1.0: Scope and Applicability</b>	<b>1-5 Rating</b>
1	Has your organization clearly defined the scope of your quality management system (QMS) with respect to the servicing of medical devices?	
2	Have you determined the regulatory requirements that apply?	
3	Are there procedures in place to review and update the QMS scope and regulatory requirements as needed?	
	<b>Section 2.0: Quality Management System</b>	
4	Do you have a documented quality management system (QMS) in place?	
5	Has your organization defined and documented its quality policy and quality objectives?	
6	Are there processes and procedures in place to manage documentation and records as required by ISO 13485?	
7	Is there a process for identifying and managing risks and opportunities related to the QMS and medical devices?	
	<b>Section 3.0: Top Management Requirement</b>	
8	Is top management committed to the establishment and continual improvement of the QMS for medical devices?	
9	Has a quality manual been established that outlines the structure of your QMS?	
10	Are there processes in place to ensure that all levels of the organization are aligned with and understand the quality policy and objectives?	

ISO Readiness Assessment from AAMI course

# Section 4: Quality Management System

## READINESS QUESTIONS

- Do you have a **quality manual** for implementing and maintaining a QMS for medical devices?
- **Management commitment** with responsibilities and resources?
- **Control of records & documents** and QMS software validation.
- Documented **evidence** to support this?

Establishes the QMS **management structure** for medical device production and servicing.

# Section 5: Management Responsibility

## READINESS QUESTIONS

- Top Management's clear role in ensuring the **effectiveness** of the QMS?
- Established quality **planning** and management **review**?
- Documented **evidence** to support this?

Defines Top management **commitment to quality** and roles to support it.

# Section 6: Resource Management

## READINESS QUESTIONS

- Adequate **resources** (human, infrastructure, etc.) to support the QMS and medical device servicing?
- **Training and qualification** for effective equipment maintenance
- Documented **evidence** to support this?

**Managing infrastructure:** people, facilities & devices.

# Section 7: Product Realization

## READINESS QUESTIONS

- Active assessment of **customer requirements**?
- Supply chain monitoring**: service, contracting, purchasing, receiving, inspection, and handling?
- ISO-ready functionality** in place? (Installation, ESD protection, calibration, and risk management).
- Documented **evidence** to support this?

Developing, producing, or servicing medical devices, including (product) & **process design and validation**.

# Section 8: Measurement, Analysis, and Improvement

## READINESS QUESTIONS

- Do you monitor **customer satisfaction** and complaint handling?
- Do manage **nonconformities** with CAPAs (corrective and preventive actions)?
- Do you perform internal & external **audits**?
- Active **Continuous Improvement** to improve the QMS?
- Documented **evidence** to support this?

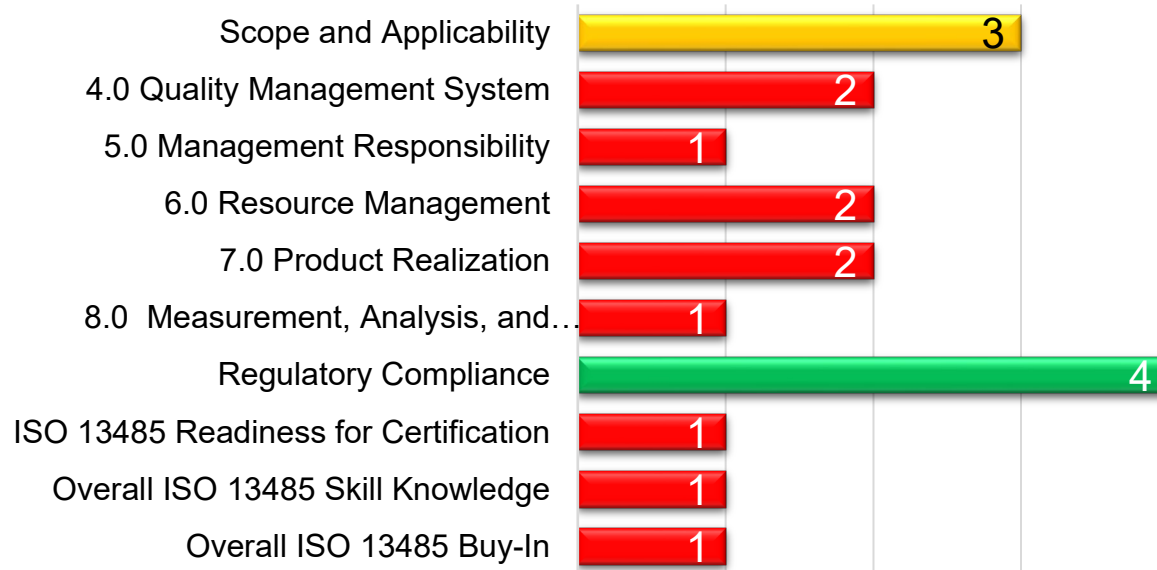

Monitoring, analyzing, and **improving processes** and product and servicing performance.

## About Us

### About SDIX

SDIX is a wholly owned subsidiary of **OriGene Technologies**, specializing in high quality, large-scale GMP antibody production in the U.S, Delaware and Maine.

For over 30 years, SDIX has been a leading immuno-solutions company, developing results-oriented and innovative antibody-based solutions that enable customers, world-wide, to meet high performance diagnostic and commercialization objectives. All sites are ISO 13485:2016 certified.

Products include critical reagents such as antibodies to Troponin I, Strep A, CRP, Apo A1, ApoB, Micro-albumin and Calibrators. SDIX's services include Polyclonal Development and production in a variety of species as well as large-scale Monoclonal Antibody Production (ascites and in vitro).

An ISO 13485  
certified  
Immuno-  
solutions  
company.
