Using Metrics and KPIs

Optimal performance of the HTM Program requires a clearly defined set of operational and strategic metrics that are tracked consistently over time.

Operational metrics will enable the HTM Program to monitor its own performance while Strategic metrics will indicate the HTM Program's contribution to enterprise missions.

One of, if not the most, important component of a metric is its definition. All too often, metrics are cited with the assumption that everyone understands it in the same way. Unfortunately, that is rarely the case and often the reason benchmarking fails to deliver the anticipated benefits.

The data required for the operational and strategic metrics is typically found in the HTM computerized maintenance management system (CMMS), the Supply Chain Management (SCM) enterprise resource planning (ERP) system, the IT service management system, and the enterprise financial reports.

Staffing Ratio

Staffing Level

Which metrics? What KPIs?

It depends.

What question are you trying to answer?

VISION

HTM will deliver the right technology, at the right location and right time with the right support to ensure the right clinical outcomes.

MISSION

HTM enables safe patient care through medical technologies, operational excellence, and value.

People

GOAL

Recruit, hire, and retain top alent to minimize the number of open positions and thereby educe the negative impact on HTM and clinical operations.

<u>INITIATIVES</u>

Immediate

1. Engage HTIVI recruiter

Near Term (1-2 yrs)

Create or adopt additional job families - technical, engineering, management, business analytics.
 Reassess service areas

 Reassess service areas (geographies) and workload distribution.

Technology

GOAL

Optimally acquire the medical equipment necessary for clinical care delivery and the management system required to manage and maintain it.

INITIATIVES

Immediate

 Implement more robust project management of the CMMS implementation and optimization
 Standardize BME work processes and documentation in the CMMS

Near Term (1-2 yrs)

3. Establish a 5-year forecast of medical equipment replacement requirements.

Governance

GOAL

Establish and maintain a forward-looking Medical Equipment Management Program (MEMP).

<u>INITIATIVES</u>

Immediate

 Draft (revise) the MEMP including all HTM policies, processes, and procedures.

Near Term (1-2 yrs)

2. Create a formal BME project delivery & management program

Financial Stewardship

GOAL

Optimize the financial resources allocated to HTM for the health system's benefit.

INITIATIVES

Immediate

Create an HTM Business
 Management Office

Near Term (1-2 yrs)

 Create a formal BME financial management program inclusive of operational and capital expenses.

People

GOAL

Recruit, hire, and retain top talent to minimize the number of open positions and thereby reduce the negative impact on HTM and clinical operations.

INITIATIVES

1. Engage HTM recruiter

UCONN | UNIVERSITY OF CONNECTICUT

college of Engineering
Biomedical Engineering Program
